Agenda/Content

09:30-09:45 Welcome

09:45-10:30 Session 1: Export Controls in the Current Security Environment – this session will provide an overview of current trends, challenges, and developments related to the implementation of export controls in today's evolving security environment, focusing specifically on controls on emerging technologies.

10:30-11:15 Session 2: Trends and Tactics in Technology Proliferation – this session will examine recent developments and current trends in the proliferation of sensitive and emerging technologies, including providing an overview as well as case studies of tactics used to evade controls on sensitive technologies.

11:15-11:30 Coffee Break

11:30-12:30 Session 3: Deep Dive into Carbon Fiber Export Control Considerations – this session will provide an in-depth examination of export control considerations for carbon fiber as a case study of an emerging technology, including examining the modalities of state and non-state actor acquisition of carbon fiber technologies and the implications of these acquisition and procurement pathways for licensing and customs officials.

12:30-13:45 Lunch

13:45-14:30 Session 4: Red Flags and Due Diligence – this session will focus on the means through which industry can ensure compliance with relevant export controls on emerging technologies, including investigating red flags and indicators of potential export control evasion, and establishing and conducting due diligence procedures. This session will also focus on communication strategies to technology holders to support their compliance responsibilities.

14:30-14:45 Coffee Break

14:45-16:15 Session 5: Interactive Exercise – participants will have the opportunity to apply the concepts discussed in the previous sessions in an interactive exercise on the implementation of export controls on emerging technologies.

16:15-16:45 Wrap-up
